Markiiside konstruktsioonid FA20 seeriast

Markiiside konstruktsioonid FA40 seeriast

Mootoriga markiisi juhtimissüsteemid:

Tuuleandur

Tuule- ja päikeseandur

Päikeseandur

Seinalüliti

TaHoma nuti juhtsüsteem

Pult

Markiisidest lühidalt

Näited Sundecori pakutavatest terrassimarkiisidest

Selle Sundecori kataloogi markiisikangad on pärit Hispaaniast, pikaajalise kogemusega tootjalt Sauleda ja Rootsi edasimüüjalt Sandatex.

Sauleda tööprotsessi ja toodete kvaliteeti tõestab ISO 9001 sertifikaat. Ka Sandatexi kangad on keskkonnasäästlikult toodetud, mõlema ettevõtte kangastel on OEKO TEX Standard 100 sertifikaat.

Kangad on ohutud inimesele ja keskkonnale ja need on toodetud vastutustundlikult.

Markiisikangaste põhiline funktsioon on pakkuda varju. Sellest lähtuvalt kaitsevad nad ka UV-kiirguse eest ja kangas on vastupidav kuumusele ja teistele päikese kahjulikele mõjudele.

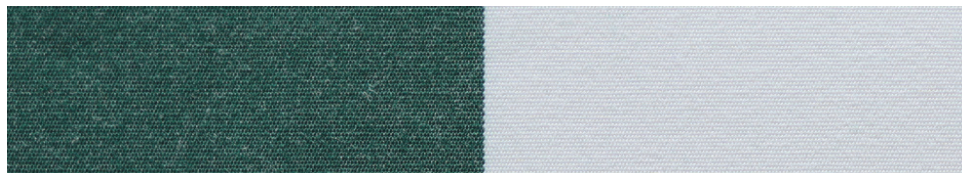

Lisaks peavad markiisikangad olema vastupidavad ka tuule ja vihma korral, kuigi see pole markiisi peamine funktsioon ja ekstreemsemate ilmaolude korral tuleks markiisi kaitsta ja see sulgeda.

Markiise saab avada ja sulgeda:

- käsitsi, vända abil
- mootori abil, mida kontrollib pult või lüliti
- päikese- ja tuuleandurite abil, mis kontrollivad mootoriga markiisi automaatselt
- nutikodu juhtsüsteemi abil, mis kontrollib mootoriga markiisi

Pakume ka TaHoma nutikodu juhtsüsteemi abil kaugkontrolli lahendust!
Nutu juhtsüsteemiga saab eemalt kontrollida erinevaid elektroonikaseadmeid – ka markiisi mootorit.
